Subject index

Volume 1

A-starch,
crystalline moiety, structure analysis 455
***Acacia gerrardii*,**
proteinaceous gums composition 327
***Acacia goetzii*,**
proteinaceous gums composition 327
Acetylated protein isolate,
Field bean, emulsifying/interfacial properties 191
Acidic proteins,
denaturation/heat gelation, effects of basic proteins 301
Agar,
polysaccharides composition, controlled conditions, *Gracilaria verrucosa* 507
substituted oligosaccharides/polysaccharides, spectroscopic analysis 529
Agar–gelatin gel,
viscoelastic behaviour, correlation to composition 153
Agarose gel,
containing urea/guanidine hydrochloride/formamide, rheological/thermal properties 25
swelling, related changes 317
***Agave sisalana*,**
carbohydrate polymers 551
Alginate,
composition, production, limiting parameters, *Azotobacter vinelandii* 101
oligoguluronides preparation 563
Alginic acid,
D-mannuronic acid/L-guluronic acid, relative proportion 559
α-Amylase,
structure/specificity relationship 407
tertiary structures, interactions, polysaccharides 399
Amylopectin,
gel, globular protein diffusion 465
Amylose,
behaviour of, dimethylsulphoxide/water mixtures 573
electron crystallography 523
gel, globular protein diffusion 465
Apple,
pectin, effects of γ-irradiation 271
pectins amino acid compositions, differences with various citrus 243
Arabinans,
degradation, enzymes, *Aspergillus niger* 423
Arachin,
heat-induced conformational changes, gel formation, low pH 181
***Aspergillus niger*,**
arabinans degradation, enzymes 423
***Azotobacter vinelandii*,**
alginate composition/production, limiting parameters 101

Barley,
starch granules characterization 521
Basic proteins,
change, structural requirements, foam enhancement 227
effects of, acidic proteins denaturation/heat gelation 301
Bipolymers,
physical gelation 485
Borate,
complexes characteristics, guar galactomannan 593
Borax,
galactomannan systems, reversible gelation, demixing 481
BSA–cellulose,
derivative mixtures, rheological behaviour 141

Calcium,
selectivity, plant cell walls 473
Campion,
pectic acid polymers, acidity/growth promotion relationship 501
Carbohydrate polymers,
Agave sisalana 551
Carob,
mixtures with xanthan, viscosities 583
Carob gum,
kappa-carrageenan/tara gum mixed gels, mechanical properties 89
Carrageenan,
heterogeneity, *Rissoella verruculosa* 413
ion binding, NMR and FTIR studies 471
mixed gels, mechanical properties 591
κ-Carrageenan,
gels, compression behaviour, effects of sucrose/cellulose 113
gels, containing urea/guanidine hydrochloride/formamide, rheological/thermal properties 25
ionic selectivity 565
tara gum/carob gum mixed gels, mechanical properties 89
Carrot,
cell wall polysaccharides, characterization 537
cloud-stable juice extraction, effects of enzymatic hydrolysis 247
comparative pectins degradation 545

Cellulose,
behaviour of β(1-4)-D-xylan 579
Biosynthesis 345
effects of, kappa-carrageenan gels compression behaviour 113
fraction, presence in, β(1→3)glucan, xyloglucan, galacturonic acid, *Rosa glauca* 553
Chitin,
behaviour of β(1-4)-D-xylan 579
biogenesis, chitosomes 353
Chitosomes,
chitin biogenesis 353
Cotton,
cell culture, isolated polysaccharides 359
***Cyamopsis tetragonoloba*,**
seeds, galactomannan biosynthesis 381

Dextrans,
effect of synthesis temperature 587
Dietary fibre,
chemical composition, physical properties 57
Dimethylsulphoxide,
water mixtures, behaviour of amylose 573

Emulsifiers,
mixed proteinaceous, protein adsorption, colloid stabilization relationship 3
Enzymatic hydrolysis,
effects of, cloud-stable juice extraction, effects of 247

Field bean,
acetylated protein isolate, emulsifying/interfacial properties 191
Flavour/taste perception,
thickened systems, effect of guar gum 197
Foam enhancement,
basic proteins, change, structural requirements 227
Foaming systems,
lipid-tolerant protein, limitations 45
Formamide,
agarose/kappa-carrageenan gels containing, rheological/thermal properties 25
Fungi,
communities organization, polysaccharidases role 519
wood polysaccharides degradation, role of H_2O_2 515

Galactans,
calorimetric study 215
Galactoglucomannan,
structure, *Rubus fruticosus* 555
Galactomannan,
biosynthesis, *Trigonella foenum-graecum*/*Cyamopsis tetragonoloba* seeds 381
borax systems, reversible gelation, demixing 481
complexes, structure 581
effects of molecular fine structure, interactive properties 129
proteinaceous component amino acid composition 95
Galacturonic acid,
content, pectins evaluation 531
presence in cellulose fraction, *Rosa glauca* 553
Gel formation,
arachin, heat-induced conformational changes, low pH 181
Gelatin,
gels, stabilization by, sugars/polyols 163
Globular protein,
diffusion, amylose/amylopectin gel 465
β(1→3)Glucan,
presence in cellulose fraction, *Rosa glauca* 553
β-Glucan,
biosynthesis, stability 365
isolation, *in vitro* production, *Phytophthora parasitica* 371
Glycosylhydrase,
apoplastic, pathogenetic marker 499
***Gracilaria verrucosa*,**
agar polysaccharides composition, controlled conditions 507
Grape,
pectic substances, structural analysis 541
Guanidine hydrochloride,
agarose/kappa-carrageenan gels containing, rheological/thermal properties 25
Guar galactomannan,
borate complexes characteristics 593
Guar gum,
effect of, flavour/taste perception, thickened systems 197
L-Guluronic acid,
relative proportion, alginic acid 559
Gum arabic,
functional characteristics 291

H_2O_2,
role of, fungi degradation, wood polysaccharides 515
Hemicelluloses,
molecular shape, cytochemical characterization, plant cell walls 557

Ion binding,
carrageenans, NMR and FTIR studies 471

Konjac mannan,
proteinaceous component amino acid composition 95

Magnesium,
selectivity, plant cell walls 473
D-Mannuronic acid,
relative proportion, alginic acid 559

Oligoguluronides,
preparation from alginate 563
Oligosaccharide,
substituted, agar, spectroscopic analysis 529
xyloglucan, anti-auxin activity 505

Pectic acid,
amidated, preparation, characterization 571
polymers, acidity/growth promotion relationship, campion 501
Pectic substances,
structural analysis, grape 541
Pectin,
amidated, preparation, characterization 121
apple, effects of γ-irradiation 271
citrus, conformation 569
comparative degradation, carrot 545
evaluation, galacturonic acid content 531
feruloyl, cross-linking 395
methylation/acetylation determination 65
structural features 567
sugar beet, characterization/cross-linking after treatment 547
various citrus, apple, amino acid compositions, differences 243
***Phytophthora parasitica*,**
β-glucan isolation, *in vitro* production 371
Polyols,
gelatin gels stabilization 163
Polysaccharidases,
role, organization, fungi communities 519
Polysaccharides,
acetylated pectic, extraction/isolation, sugar beet 71
agar, composition, controlled conditions, *Gracilaria verrucosa* 507
characterization, cell wall, carrot 537
enzymatic modification, brewing/baking/syrup manufacture 445
extracellular, galactoglucomannan structure, *Rubus fruticosus* 555
$\beta(1\rightarrow3)$glucan, xyloglucan, galacturonic acid, presence in cellulose fraction, *Rosa glauca* 553
in vitro production, *Phytophthora parasitica* β-glucan isolation 371
interactions, α-amylase 399
isolated, cotton cell culture 359
starch, molecular interactions in aqueous solutions 449
substituted, agar, spectroscopic analysis 529
wheat straw cell wall, effects of acid treatment 513
wood, fungi degradation, role of H_2O_2 515
Potato,
amylose-free starch, mutant 393
starch biosynthesis, starch enzymes identification 387
starch synthesis 497
Protein,
concentrates, whey, gelation 277
lipid-tolerant, foaming systems, limitations 45
surfactant properties, effects of hydrophobicity 283
Proteinaceous gums,
composition, *Acacia gerrardii*, *Acacia goetzii* 327

***Rissoella verruculosa*,**
carrageenan heterogeneity 413
***Rosa glauca*,**
$\beta(1\rightarrow3)$glucan, xyloglucan, galacturonic acid, presence in cellulose fraction 553
***Rubus fruticosus*,**
extracellular polysaccharides/galactoglucomannan structure 555

Seed endosperm,
galactomannans, proteinaceous component amino acid composition 95
Sodium alginate,
molecular weight, differences between preparations, factors involved 207
Sodium carboxymethylcellulose,
dietary effects, man 37
Soluble polysaccharides,
rheological behaviour, soybean 333
Soybean,
soluble polysaccharides, rheological behaviour 333
Starch,
amylose-free, potato mutant 393
gelatinized, wheat, in gels/powders, retrogradation kinetics 575
granules, characterization, barley 521
polysaccharides, molecular interactions in aqueous solutions 449
potato, starch enzymes identification, biosynthesis 387
retrogradation, new study method 461
structure 527
swollen granules, rheology 589
synthesis, potato 497

Starch enzymes,
identification, potato 387
Sucrose,
effects of, kappa-carrageenan gels compression behaviour 113
Sugar beet,
acetylated pectic polysaccharides extraction/isolation 71
fibres, characterization, enzymic degradation 439
pectins characterization/cross-linking after treatment 547
Sugars,
gelatin gels stabilization 163

Tara gum,
kappa-carrageenan/carob gum mixed gels, mechanical properties 89
***Trigonella foenum-graecum*,**
seeds, galactomannan biosynthesis 381

Urea,
agarose/kappa-carrageenan gels containing, rheological/thermal properties 25

Wheat,
bran fibres, digestion in man, effects on lipid excretion 511
gelatinized starch in gels/powders, retrogradation kinetics 575
Wheat straw,
cell wall polysaccharides, effects of acid treatment 513
Whey,
protein concentrates, gelation 277
Wood,
polysaccharides, fungi degradation, role of H_2O_2 515

Xanthan,
mixtures with carob, viscosities 583
Xanthan gum,
proteinaceous component amino acid composition, seed endosperm 95
β(1-4)-D-Xylan,
behaviour with cellulose/chitin 579
Xyloglucan,
biosynthesis, stability 365
oligosaccharide, anti-auxin activity 505
presence in cellulose fraction, *Rosa glauca* 553
